

# 专刊征稿 | Emerging Markets Finance and Trade | 新兴市场金融与贸易

► 期刊 (Journal): Emerging Markets Finance and Trade (一区, IF = 7.8)

► 专刊主题 : Risk Management, Corporate Governance, and Artificial Intelligence in the Digital Economy

► 投稿截止日期 (Deadline): 2025 年 11 月 30 日

## Introduction

### 专刊介绍

在当今时代，数字经济以前所未有的速度迅猛发展，深刻地改变了全球的经济格局和商业运营模式。在这一动态且复杂的环境中，风险管理、公司治理与人工智能成为了至关重要的要素。数字经济的快速迭代与创新带来了诸多不确定性和潜在风险，如网络安全威胁、数据隐私泄露、市场波动加剧等，这使得有效的风险管理变得尤为关键。同时，公司治理需要适应数字时代的要求，重新审视和优化决策流程、组织结构和监督机制，以确保企业的可持续发展和利益相关者的权益。而人工智能作为数字经济的核心驱动力，正日益渗透到风险管理和公司治理的各个环节，为其带来了前所未有的机遇和挑战。它能够通过强大的数据分析和预测能力，帮助企业更好地识别风险、优化决策，并提升运营效率。

本期特刊聚焦于数字经济中的风险管理、公司治理与人工智能的最新进展。我们热忱欢迎涵盖从理论创新到实际应用的各类投稿，共同探索数字经济

背景下这三个领域的未来发展方向。本期特刊旨在推动数字经济环境下风险管理 and 公司治理的方法学和技术进步，并支持企业在数字时代实现可持续发展。

In today's era, the digital economy is developing at an unprecedented speed, profoundly transforming the global economic landscape and business operation models. In this dynamic and complex environment, risk management, corporate governance, and artificial intelligence have become crucial elements. The rapid iteration and innovation in the digital economy bring numerous uncertainties and potential risks, such as cyber - security threats, data privacy breaches, and intensified market volatility, making effective risk management particularly critical. At the same time, corporate governance needs to adapt to the requirements of the digital age, re - examine and optimize decision - making processes, organizational structures, and supervision mechanisms to ensure the sustainable development of enterprises and the rights and interests of stakeholders. Artificial intelligence, as the core driving force of the digital economy, is increasingly penetrating all aspects of risk management and corporate governance, bringing unprecedented opportunities and challenges. It can help enterprises better identify risks, optimize decisions, and improve operational efficiency through its powerful data analysis and prediction

capabilities.

This special issue focuses on the latest advances in risk management, corporate governance, and artificial intelligence in the digital economy. We warmly welcome all types of submissions covering from theoretical innovation to practical applications to jointly explore the future development directions of these three fields in the context of the digital economy. This special issue aims to promote methodological and technological progress in risk management and corporate governance in the digital economic environment and support enterprises to achieve sustainable development in the digital age.

### Guest Advisors

#### 客座编辑

Dr JiuHong Yu, 宁波财经学院, 中国

Dr Chi-Wei Su, 青岛大学, 中国

### Topic of Interest

#### 征稿主题

- **Digital Economy Infrastructure** (papers that propose new research issues in areas of digital payment systems, blockchain technology, and cloud computing adoption in multinational enterprises are particularly welcomed).
- **Strategic Management and Firm Performance** (papers that explore digital strategy formulation; competitive advantage in digital markets; and organizational agility in technology-driven industries are particularly welcomed).

- **AI-Driven Risk Analytics** (papers that examine predictive analytics for risk assessment; natural language processing in regulatory compliance; and computer vision applications in operational risk management are particularly welcomed).
- **Digital Innovation Management** (papers that analyze the role of artificial intelligence in strategic decision-making and innovation ecosystems are particularly welcomed).
- **Fintech and Digital Banking** (papers that develop hypotheses relating to digital banking transformation and the role of AI in financial services are particularly welcomed).
- **ESG Risk and Digital Reporting** (papers that develop hypotheses relating to environmental risk assessment using AI and sustainability reporting in digital platforms are particularly welcomed).
- **Corporate Governance in Digital Transformation** (topics that explore board effectiveness in technology oversight; governance mechanisms for AI adoption; and stakeholder management in digital ecosystems are particularly welcomed).
- **Risk Management in Emerging Markets** (papers that explore enterprise risk management frameworks; operational risk in digital environments; and cybersecurity risk assessment are particularly welcomed).
- **Artificial Intelligence Applications** (papers that explore AI in financial risk modeling; machine learning for corporate performance prediction; and automated decision-making systems are particularly welcomed).
